InfoWorld Jun 10 2021 InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Network World Feb 25 2020 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Issues in Applied, Analytical, and Imaging Sciences Research: 2011 Edition Apr 20 2022 Issues in Applied, Analytical, and Imaging Sciences Research: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Applied, Analytical, and Imaging Sciences Research. The editors have built Issues in Applied, Analytical, and Imaging Sciences Research: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Applied, Analytical, and Imaging Sciences Research in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Applied, Analytical, and Imaging Sciences Research: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Carbon Monoxide Toxicity Dec 17 2021 Public interest in the health impacts of carbon monoxide (CO) has been increasing rapidly during the past decade. And rightly so: it is the most ubiquitous environmental poison. Car exhaust fumes, furnaces, gas-powered engines, home water heaters, smoke from all types of fire, and tobacco smoke all contribute to carbon monoxide intoxication - the leading cause of poisoning death in the United States. Even when it doesn't cause death, it often produces lasting, deleterious effects on the central nervous system. From one of the world's top CO experts, Carbon Monoxide Toxicity examines the latest basic science and clinical research from around the world. It addresses the gamut of health-related CO issues, from the history of CO studies to the hidden threat of chronic low-level exposure. The broad themes center on clinical management of various forms of CO poisoning and education of the public on the constant dangers of CO. Thanks to the success of CO environmental health regulations in the U.S., society is much more aware of the threat of CO poisoning. Increasing numbers of people use CO detectors in public buildings, homes, pleasure boats, and aircraft. Carbon Monoxide Toxicity meets the need for current research on the clinical management of CO poisoning. Visit the author's Web site at www.coheadquarters.com

Dietary Protein Research Trends Dec 05 2020 Proteins are made of strings of amino acids that form chains known as peptides. Our bodies need dietary protein to accomplish many basic functions, such as building bones, moving muscles, and repairing tissue. Dietary protein, an essential nutrient, comes from meat, dairy, and certain grains and beans. Proteins differ by the types and order of amino acids they contain. Even though there are only 20 amino acids, they create almost endless variations in chains as long as 500 links. Proteins form inside animals (including humans) and plants through processes that synthesize peptides. For humans, we cannot synthesize certain "essential protein," and so we must ingest them through food. These essential proteins are made of phenylalanine, threonine, methionine, tryptophan, leucine, isoleucine, lysine, and valine amino acids. Food from plants, like corn, have incomplete protein, which means they do not contain all the necessary amino acids. Only food from animals, such as cheese and fish, provide complete protein, and don't need to be combined with other protein sources. Examples of complete protein foods are milk, cheese, yogurt, butter, poultry, pork, or any meat. Incomplete proteins include oats, wheat, pasta, lentils, nuts, rice, soy, pears, and seeds. Eating a combination of complementary protein sources, such as grains mixed with legumes, results in a diet of essential protein. This is how vegetarians and vegans maintain health without eating meat or dairy. This book presents the latest research in this dynamic field.

Surfactants in Solution Nov 15 2021 This volume chronicles the proceedings of the 8th International Symposium on Surfactants in Solution (SIS) held in Gainesville, FL, June 10-15, 1990. This series of symposia have been smoothly running since 1976, but the appellation "Surfactants in Solution" was used for the first time in 1982 in Lund. Since then our logo "SIS" has become very familiar to everyone involved in surfactants. In Lund the meeting was billed as the Fourth International Symposium on Surfactants in Solution. Earlier three events were held under different rubrics, but proceedings of all these symposia, except the 7th SIS held in Ottawa in 1988, have been properly documented. As a matter of fact so far 10 volumes have appeared under the title "Surfactants in Solution". 1,2,3 The program for the 9th SIS was very comprehensive and many ramifications of surfactants were covered, and it was a veritable international event. It contained a total of 384 papers by 869 authors from practically every corner of our planet. Just the sheer number of papers is a testimonial to the high tempo of research and tremendous interest in this wonderful class of materials. As in the past, there were plenary lectures (5), invited talks (37), oral presentations (195) and poster presentations (147). The plenary lectures were given by Prof. J. Th. G. Overbeek, Prof. C. A. Bunton, Prof. H. Ti Tien and Dr. J. Swalen. The lecture by Prof. Overbeek, the doyen of surface and colloid science, was a real treat.

Polymer Biomaterials in Solution, as Interfaces and as Solids Jan 18 2022 The articles collected in this publication have previously been published in eight special issues of the Journal of Biomaterials Science, Polymer Edition, in

honour of Dr. Allan S. Hoffman, who is known as a pioneer, a leader and a mentor in the field of biomaterials. The papers from renowned scientists from all parts of the world, representing the

Perfusion for Congenital Heart Surgery Nov 27 2022 A complete guide to the tools and techniques for modeling, simulating, and optimizing SSFE processes and phenomena In Modeling, Simulation, and Optimization of Supercritical and Subcritical Fluid Extraction Processes, a team of expert chemical engineers delivers a comprehensive guide to the tools and techniques used to model supercritical and subcritical fluid extraction (SSFE) processes and phenomena.

The book offers details on SSFE experiment management, as well as modeling and optimization of SSFE. The authors begin with a discussion of the fundamentals of SSFE and the necessary experimental techniques to validate the models. They also discuss process simulators, conventional optimization techniques, and state-of-the-art genetic algorithm methods. Several practical examples and case studies on SSFE modeling and optimization techniques are provided. Additionally, detailed thermodynamic modeling with and without co-solvent and non-equilibrium system modeling are covered. Readers will also find: A detailed overview of the field of supercritical and subcritical fluid extraction and their importance to the food, cosmetics, and pharmaceutical industries Explorations of the concepts and methodologies for modeling, simulation, and optimization of SSFE, including conservation laws related to SSFE traditional first principle modeling Practical discussions of the characteristics and physical properties of palm oil as a solute and descriptions of some existing palm oil industrial processes An examination of first principle methodology as applied to the modeling of the properties of palm oil components and mixtures Perfect for researchers, scientists, technologists, and engineers working in food science and the pharmaceutical, cosmetic, and agricultural industries, Modeling, Simulation, and Optimization of Supercritical and Subcritical Fluid Extraction Processes is also a must-read for those working with process design, development, quality control, and improvement in the chemical industries.

Managing Growth Jun 30 2020 The problems inherent in the business venture life cycle are discussed theoretically and applied to case studies in this business guide for entrepreneurs and small business owners on growth and management strategies for business start-ups.

Equine Clinical Nutrition Oct 22 2019 EQUINE CLINICAL NUTRITION Authoritative resource on the nutritional management of horses, now incorporating the iterative learning process The second edition of Equine Clinical Nutrition is a fully updated and expanded revision of the classic student text on nutritional management of horses, covering updated nutrient recommendations, rations, feeding management, clinical nutrition and many other important topics in the field. To aid in reader comprehension, this new edition takes a new instructional approach to nutritional management using an iterative sequence of defined procedures. Divided into distinct sections for easy accessibility, this book is a comprehensive resource for feeding practices and management of healthy and sick horses alike. A thorough understanding of life stages, anatomy, physiology, and behavior underpins the practice of clinical nutrition. Sample topics covered in Equine Clinical Nutrition include: The evolution of horses to changing food supply, the importance of their microbiome, and the behavior patterns of feeding and drinking Nutrient metabolism of water, energy, protein, minerals, and vitamins, plus ration assessment, farm investigations, forages, and toxic plants Manufactured feeds, dietary supplements, USA feed regulations, and feed safety protocols Nutritional assessment of horses by life stage, recognizing pain and discomfort behaviors, and dietary management of weight and major system disorders Equine Clinical Nutrition is an essential text for students of veterinary medicine, animal science, pre-veterinary programs, and a desk reference for equine practitioners wanting practical clinical feeding recommendations. With comprehensive coverage of the topic, it is an essential text for everything related to nutrition in horses.

Curren's Math for Meds: Dosages and Solutions Oct 27 2022 Now in its 11th Edition, CURREN'S MATH FOR MEDS: DOSAGES AND SOLUTIONS is the preeminent authority on drug dosage calculations, ratio and proportion, and medication safety. Often imitated yet never equaled, the book delivers proven material with a concisely organized approach that takes you from basic to complex using a building block approach. Coverage begins with chapters designed to review and confirm basic math principles. Common drug measures are introduced next, followed by detailed lessons on medication labels and dosage calculations. Instructions on body weight and body surface area, intravenous calculations, and pediatric medication calculations follow. This new edition of CURREN'S MATH FOR MEDS: DOSAGES AND SOLUTIONS features full-color photos of drug labels and syringes, as well as hundreds of examples, practice problems, self-test questions, and more for developing learners into safe and effective practitioners. Deliver your course with help from the master, Anna Curren, and CURREN'S MATH FOR MEDS: DOSAGES AND SOLUTIONS, 11th Edition—the only calculations text to reach more than a million learners! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Large Animal Internal Medicine - E-Book Mar 08 2021 NEW! Global conditions of importance are covered, including those previously not discussed, that exist in Europe, Central and South America, Australia, and New Zealand.

NEW! Coverage of emerging and re-emerging diseases includes the new pathogen discovery. NEW! Assessment of vaccination status and susceptibility to infection discusses how antibody titers can predict protection for some pathogens. NEW! Description of epigenetics and metagenomics provides detailed coverage of these emerging areas of interest. NEW! Table of zoonoses obtained from large animals includes symptoms and disinfection needs. NEW! Coverage of genetic disorders, Hydrocephalus in Fresians and Pulmonary hypoplasia with Anasarca in Dexter cattle help you to treat these disorders. NEW! Extensively updated content clarifies the latest research and clinical findings on the West Nile Virus, therapeutic drug monitoring, muscle disorders, GI microbiota, the genetic basis for Immune-mediated myositis in Quarter Horses, discoveries in antimicrobial drugs, anthelmintic, and vaccines, and more!

NETWORKING 2005. Networking Technologies, Services, and Protocols; Performance of Computer and Communication Networks; Mobile and Wireless Communications Systems Dec 25 2019 This book constitutes the refereed proceedings of the 4th International IFIP-TC6 Networking Conference, NETWORKING 2005, held in Waterloo, Canada in May 2005. The 105 revised full papers and 36 posters were carefully reviewed and selected from 430 submissions. The papers are organized in topical sections on peer-to-peer networks, Internet protocols, wireless security, network security, wireless performance, network service support, network modeling and simulation, wireless LAN, optical networks, Internet performance and Web applications, ad-hoc networks, adaptive networks, radio resource management, Internet routing, queuing models, monitoring, network management, sensor networks, overlay multicast, QoS, wireless scheduling, multicast traffic management and engineering, mobility management, bandwidth management, DCMA, and wireless resource management.

Solution Protocols to Festering Island Disputes May 29 2020 Since the coming into force of the United Nations Law of the Sea, states have been targeting outlying islands to expand their exclusive economic zones, simultaneously stirring up strident nationalism when such plans clash with those of neighbouring states. No such actions have brought the world closer to the brink of war than the ongoing face-off between China and Japan over the Diaoyu/Senkaku islands, an uninhabited archipelago in the East China Sea. In this timely and original book, Godfrey Baldacchino provides a detailed exploration of seven tried and tested solution protocols that have led to innovative 'win-win'

solutions to island disputes over the last four centuries. A closer look at the circumstances and processes that brought contending regional powers to an honourable, even mutually advantageous, settlement over islands provides a convincing and original argument as to why the conflict over the Diaoyu/Senkaku islands need not conclude in a 'zero-sum' or 'winner takes all' solution, as is the likely outcome of both open conflict and international arbitration. The book will be of interest to scholars and practitioners concerned with the festering Diaoyu/Senkaku dispute, as well as students, scholars and policy specialists in geography, geopolitics, international relations, conflict studies, island studies, Asian studies and history.
