Guide to the Ultrasound Examination of the Abdomen Jun 21 2022 and *User's Guide Abdominal ultrasound examinations* are now performed mainly with real-time instrumentation, thereby giving the user tremendous flexibility in the manner in which the examination is conducted. However, with such flexibility come significant problems as well. Because fields of view are small, and because the operator can readily move the probe anywhere in the abdomen to see structures in a variety of planes and sections, it is relatively easy to become disoriented or to miss significant findings unless the examination protocol is carefully devised. The operator must approach the task of scanning the patient in a logical and organized way that is related to the patient's clinical findings as well as to the findings discovered during the ultrasound examination. This book has been written to assist the operator in performing an organized and directed ultrasound examination by providing in outline form a sequential approach to the scanning of abdominal organs and regions. This approach has several functions: 1) to indicate the structures within the organ or region that should be scanned; 2) to suggest other regions to examine if abnormalities within the initially imaged structures are detected; and 3) to suggest differential diagnostic possibilities when abnormalities are seen.

The Supposedly Enlightened Person’s Guide to Raising a Dog May 08 2021 Kac Young never imagined that, after a lifetime as a ‘cat person,’ she would fall in love with, and adopt, a tiny rescue dog called Talulah. Kac loved other people’s dogs, but “I never had time, and they smell funny, lick off your makeup, and pee on your new shoes.” All that changed when she met Talulah, and just had to take her back to her home in the Californian forest, that she shared with her partner and six cats. Soon after Talulah took up residence, Truffle was also adopted by Kac, and this book is the fascinating story of Kac’s progression from slightly shell-shocked beginner to savvy, adoring dog guardian. Right from the start, Kac consulted behaviourist Lisa Tenzin-Dolma on all things dog-related, and Lisa’s observations and wise guidance on a wide range of subjects follow Kac’s accounts, providing vital insight about the best way to go about building a loving, trusting relationship between you and your dog. Entertaining and informative, this book will appeal to new and seasoned dog guardians alike. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 11.0px Arial}
