Based on nearly five decades of research, this magisterial work is a biographical register and analysis of the people who most directly influenced the course of the Civil War, its high commanders. Numbering 3,396, they include the presidents and their cabinet members, state governors, general officers of the Union and Confederate armies (regular, provisional, volunteers, and militia), and admirals and commodores of the two navies. Civil War High Commands will become a cornerstone reference work on these personalities and the meaning of their commands, and on the Civil War itself. Errors of fact and interpretation concerning the high commanders are legion in the Civil War literature, in reference works as well as in narrative accounts. The present work brings together for the first time in one volume the most reliable facts available, drawn from more than 1,000 sources and including the most recent research. The biographical entries include complete names, birthplaces, important relatives, education, vocations, publications, military grades, wartime assignments, wounds, captures, exchanges, paroles, honors, and place of death and interment. In addition to its main component, the biographies, the volume also includes a number of essays, tables, and synopses designed to clarify previously obscure matters such as the definition of grades and ranks; the difference between commissions in regular, provisional, volunteer, and militia services; the chronology of military laws and executive decisions before, during, and after the war; and the geographical breakdown of command structures. The book is illustrated with 84 new diagrams of all the insignias used throughout the war and with 129 portraits of the most important high commanders. What is the state? The State of Freedom offers an important new take on this classic question by exploring what exactly the state did and how it worked. Patrick Joyce asks us to re-examine the ordinary things of the British state from dusty government files and post offices to well-thumbed primers in ancient Greek and Latin and the classrooms and dormitories of public schools and Oxbridge colleges. This is also a history of the 'who' and the 'where' of the state, of the people who ran the state, the government offices they sat in and the college halls they dined in. Patrick Joyce argues that only by considering these things, people and places can we really understand the nature of the modern state. This is both a pioneering new approach to political history in which social and material factors are centre stage, and a highly original history of modern Britain. The auto repair manual that do-it-yourselfers have relied on to save money now covers 1981-88 domestic cars. This updated edition covers Detroit's newest models including the new Chrysler TC, Chevrolet Corsica and Pontiac LeMans. The most asked-for book of its kind. More than 3,000 illustrations.
