"The motive for this work was to make the teachings of Kraepelin in psychiatry accessible to American medical students and general practitioners, and, at the same time, to provide a full, but concise, textbook, not only for the writer's own classes in psychiatry in the Medical

Department of Yale University, but as well for other American teachers who follow Kraepelin's views. Urged by the rapidly increasing interest in Professor Kraepelin's teaching during the past five years in this country and the constantly growing number of his disciples, it was the writer's first intention to publish a complete translation of the sixth edition of Kraepelin's "Lehrbuch der Psychiatrie." It was feared, however, that a full translation would be too large to best subserve the function of a textbook, and would have rendered impossible the adaptation of the Kraepelin psychiatry to our peculiar American needs. The classification, terminology, and, wherever possible, the phraseology of this work are Kraepelinian, but the writer has taken the liberty of abbreviating disproportionately the description of some psychoses which are of less importance to the American physician, especially the constitutional psychopathic states and thyroigenous insanity, and of laying more stress upon other more important forms, the description of acquired neurasthenia, traumatic neuroses, also the treatment in epileptic and hysterical insanity and acquired neurasthenia. The only omissions are the general etiology, diagnosis, and treatment in the first volume of Kraepelin, but such points as are of most importance have been added to the etiology, diagnosis, and treatment of the different diseases"--Preface. New Syllabus Mathematics (NSM) is a series of textbooks and workbooks designed to prepare students for the Singapore-Cambridge GCE O-level examination in Mathematics. Together with the textbook, the workbook will provide students with ample practice to apply the various skills and concepts learnt to solving problems in both examination and real-life situations. The workbook contains the following features: REVISION NOTES Revision Notes are found at the start of each chapter. They emphasise the important concepts and formulae in the chapter. PRACTICE QUESTIONS Practice Questions provide

students with a wide range of questions for further practice. The questions are classified into three levels of difficulty. ♦ questions require students to use specific skills and concepts in the chapter directly to solve problems. ♦ questions require students to apply their skills and concepts to solve problems. ♦ questions require students to apply various skills and concepts, including the use of problem-solving skills, to solve problems.

Revision Exercise The *Revision Exercise* is found after every few chapters to help students to recall and consolidate all the concepts learnt in these chapters.

Mid-Year Specimen Papers and End-Year Specimen Papers The *Mid-Year Specimen Papers and End-Year Specimen Papers* have been written to follow closely to the format of schools' *Mid-Year and End-of-Year* examinations. It is hoped that when students use this book, to reinforce the concepts that they are weak in, they will eventually gain success in Mathematics.

Public administration is a craft that demands real-world application of concepts and theories often learned in a classroom. Yet many students find it difficult to make the leap from theory to practice completely unaided. The Public Administration Workbook, 8e is specifically designed with the theoretically-grounded, practice-minded student in mind. It reviews scholarship in political science, law, industrial psychology, and the sociology of organizations and then allows students to see how these intellectual fields inform the analytical and managerial tasks that comprise public administration. Where standard public administration textbooks examine the nature of public agencies and explain how bureaucracies relate to other institutions, this workbook promotes a more effective way of learning—by doing—and more directly prepares those who will pursue careers in public agencies. Each chapter begins with a discussion of relevant concepts and scholarship before moving into a hands-on exercise analyzing core analytical and management challenges. This edition includes an all-new exercise on contract negotiation, many international examples interwoven throughout the book, and a fully updated HRM section to reflect alternative ranking and compensation systems. Each chapter is further supported by a detailed Instructor's Manual written by the author to guide instructors on solutions, explanations, and ideas for using or modifying the exercises to fit a variety of course needs, as well as downloadable datasets and exercises, providing students with a unique opportunity to apply and test classroom concepts outside of the job.
