considered to be the seminal work of Kabbalah because it is a mystical interpretation of the Old Testament's creation story, and Kabbalists delve beneath the surface of the Bible to understand the unspoken mysteries of how the world came to be. *Ancient Secrets of Creation* is a new translation and reinterpretation of *Sepher Yetzira* that provides the answers to questions about how God created the world, especially how the expression, "And God said" is used. Because of *Sepher Yetzira*'s succinctness and the passage of time, its implicit meanings have been lost. However, this work provides a fresh understanding of *Sepher Yetzira* by rediscovering and clearly explaining those mathematical, scientific, philosophical, and theological foundations on which it rests. These include pertinent pre-Socratic Greek philosophies; the ideas of Plato, Plotinus, Iamblichus, Neopythagoreanism, and Neoplatonism; as well as the works of Philo of Alexandria,

the Old Testament, and rabbinic understandings at the time that *Sepher Yetzira* was written. This translation and explication unlock the secrets hidden within the Hebrew-language text of *Sepher Yetzira*, the book that started Kabbalah. How cultural categories shaped--and were shaped by--new ideas about controlling nature Ranging from alchemy to necromancy, "books of secrets" offered medieval readers an affordable and accessible collection of knowledge about the natural world. Allison Kavey's study traces the cultural relevance of these books and also charts their influence on the people who read them. Citing the importance of printers in choosing the books' contents, she points out how these books legitimized manipulating nature, thereby expanding cultural categories, such as masculinity, femininity, gentleman, lady, and midwife, to include the willful command of the natural world.
