Child advocate attorney, Liz Fallon, desperately needs a break after legal blunders and her own negligence lead to the kidnapping and death of a mother and daughter she represents. Fluent in her mother's native Corsican tongue, she nabs a job at a Paris newspaper as a lingua corsa translator for Pierre Benatar, whose coverage of the explosive Corsican Nationalist movement has enraged every separatist faction. When Benatar and his seven-year-old son disappear, she resolves to prevent another tragedy and cons her way to Corsica under the ruse of researching a tabloid story about the mazzeri, the isle's ancient harbingers of death. She cozies up to the prime suspects using her secret knowledge of lingua corsa and the aid of an elderly Brit and a courageous teen Corsican cousin. The hunters suddenly become the hunted when Liz's inquiries arouse the suspicions and passions of both the separatist leader and the French police chief. When the mazzeri story also takes a chilling personal turn, she has to wonder whether Corsica intends to reclaim her as its prodigal daughter or destroy her. Excerpt: Connection Timeout Mini (styled as MINI) is a British automotive marque owned by BMW which specialises in small cars. Mini originated as a specific vehicle, a small car originally known as the Morris Mini-Minor and the Austin Seven, launched by the British Motor Corporation in 1959, and developed into a brand encompassing a range of small cars, including the Clubman, Traveller and Moke. The original two-door Mini continued in production until 2000. Development of a successor began in 1995 and the new generation car was launched in 2001. The Mini range has since expanded from the core two-door Hardtop/Hatch to include the Clubman (estate), Convertible and Countryman (crossover). The Mini brand originally belonged to British Motor Corporation, which in 1966 became part of British Motor Holdings. British Motor Holdings merged with Leyland Motors in 1968 to form British Leyland. In the 1980s British Leyland was broken-up and in 1988 Rover Group, including Mini, was acquired by British Aerospace. In 1994 Rover Group was acquired by BMW. In 2000 Rover Group was broken-up by BMW, with BMW retaining the Mini brand. The... Like the Nova before it, the Vauxhall Corsa has proved to be a big hit with the car modifying world. WHAT LIES BENEATH A peaceful Sunday morning in Rutland is shattered when a dead body is discovered on the rocks at Normanton Church. The victim has been laid out in a crucifixion pose, facing the altar. DI Caroline Hills is certain there's a religious connection — one which threatens the tranquility of life in the area. The killer has gone to extraordinary lengths to make the symbolism clear. And the deaths will continue until Caroline and DS Dexter Antoine uncover the truth behind the dark secret — and what lies beneath. ON BORROWED TIME Each morning, the first train of the day leaves Oakham station and thunders through a tunnel under the village of Manton. But today the driver sees something that changes his life: A dead body hangs in the tunnel's exit. DI Caroline Hills knows this isn't a suicide. It's murder. And when a second apparent suicide appears in Rutland, Caroline uncovers a shocking link: the victims knew each other. As Rutland Police fight to catch the killer, a group of friends is left with an even more shocking realisation. One of them is the murderer. And one of them will be the next to die. IN COLD BLOOD A body is found under Welland Viaduct on a bitterly cold winter morning. But this will be a murder investigation like no other. As DI Caroline Hills and DS Dexter Antoine begin to unravel the dark secrets in the victim's life, they find themselves sucked into a web of lies and betrayal. Rutland Police need to find the killer before it's too late. But with Caroline's health failing and their main witness suspiciously missing, the stakes couldn't be higher. Dark histories, mysterious gifts and hidden secrets abound. But will they discover the truth before anyone else is killed in cold blood? The work is a study of the formation, operation and application of a semiconductor field emission cathode consisting of one or more individual emitting points on a broad area cathode. The material primarily used was germanium. Two methods of forming these cathodes were studied; a vacuum breakdown method and one using radiation from a pulsed ruby laser focused on the cathode surface. The former is the method by which the cathode was first revealed. The latter holds the most promise for making cathodes practical. Both types of cathodes were observed with a scanning electron microscope to aid in understanding the mechanism by which the very regular emitting points are formed. The electrical characteristics of the cathode were studied experimentally and found to agree with theory of semiconductor field emission. A retarding potential analyzer was designed and built to measure the energy distribution for electrons emitted from individual points on the cathode. An electron optical system was used to study the operation of the semiconductor cathode as an electron source for such applications as in a cathode ray tube or similar device requiring a low-current electron beam. (Author). Like the Nova before it, the Vauxhall Corsa has proved to be a big hit with the car modifying world. But how to choose from the endless variety of products available, and how to fit them? Haynes and Max Power magazine have joined forces to produce a full-colour title on DIY modifying, covering everything from fitting a sunstrip to ICE installs and bodywork mods. I and diesel models. Depending on the type of vehicle, the difference in price between an electric car and an internal-combustion-engined one can be several thousand pounds, even after the government's Plug-in Car Grant (PCG) has been applied. The day that electric cars cost the same as petrol and diesels is expected to arrive in the next two to five years, but for now, buyers have to make peace with the fact that access to an electric vehicle's low running costs requires a steep initial outlay. Having said that, buying an electric car needn't break the bank if you know where to look. There are several battery-powered cars out there with competitive price tags, providing an entirely affordable route into the world of cars. Advertisement To help you on your way, we've put together a list of the top cheap electric cars on sale today. Not all of them will suit your needs - ranges and charge times vary from model to model - but there'll almost certainly be something that ticks all the right boxes. And remember, once you've met the asking price, the total cost of ownership could still be significantly lower than that of a petrol or diesel model, with electricity bills amounting to around three pence per mile on an average household tariff. For those charging overnight - when electricity is cheapest - that figure could be even lower! Scroll down to read our list of the cheapest electric cars, starting with... Vauxhall Corsa-e - £26,490 The Vauxhall Corsa-e is the British brand's first electric car, and it offers 205 miles of range from a 50kWh battery. That's a reasonable return on paper, and 0-31mph in 3.1 seconds should mean it's a pretty nippy runabout, ideal for those who do most of their driving around town. The maximum charging speed is 100kW, which means a 0-80% charge should take around half an hour. So if you do need to go further afield occasionally (and your route has a charging station along the way) then this is feasible, too. Read more about the Vauxhall Corsa-e. This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work. A vibrant history of the Giro d'Italia in its 100th edition. This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work. The Giro d'Italia is the cooler, tougher brother of the Tour de France. First staged in 1909, and only pausing for two World Wars, its hundredth edition takes place in 2017. Inspired by L'Auto's improved circulation figures after establishing France's Grand Tour, the Gazzetta dello Sport saw an opportunity to outdo its rival paper, the Corriere della Sera, by organising its own race. From its first years the Giro pushed riders to their limits with brutal climbs, treacherous road conditions, appalling weather and epic distances. Time has changed the Giro to a degree, but it remains as ferociously testing - and as beloved of cycling's romantics - as ever. All the winners are covered: from the first victors Luigi Ganna and Carlo Galetti, to the likes of Alfredo Binda, Costante Girardengo and Gino Bartali, past the legends of Fausto Coppi and Eddy Merckx, on to Bernard Hinault, Miguel Indurain and Marco Pantani, and then right up to today's champions Vincenzo Nibali, Nairo Quintana and Alberto Contador. The history of the Giro is the history of cycling's superstars. The battles for supremacy, the controversies and skulduggery, the fame and the glory, and the iconic stages all feature. In Corsa Rosa, Gallagher skillfully combines history, anecdote and analysis to bring this ultimate test of endurance vividly to life. If you've found this book then you are either already a driving instructor, in which case, you will most certainly identify with its contents and will have a giggling time reading it, or you are a generally interested reader, looking for some entertaining humour, or you are someone who is thinking about becoming a driving instructor. If you are the latter, that's brilliant! You are going to need this book! It tells the honest hilarious truth about what it's really like out there, with pupils of varying character and ability, in death defying situations! The idea of spending your days happily driving with eager-minded pupils, teaching them how to correctly drive your car, while they absorb your words of wisdom and transition into natural perfect drivers is a lovely one, and true enough, every now and then, such a perfect pupil will come along. But trust me, they are rare!... Enjoy this brilliant amalgamation of funny, yet true driving instructor experiences, told in a gentle, yet humorously sarcastic manner. Mick Walker's Italian

Racing Motorcycles Mick Walker. This much enlarged and heavily revised edition looks at both major and minor players throughout Italy who have produced racing motorcycles of significant interest. Among the legendary Italian motorcycles included in this volume are Aermacchi, FB Mondial, Bimota, Moto Guzzi, Ducati, Garelli, Bianchi, Laverda, Gilera, MV Agusta and Parilla. Well done! Sftbd., 8 1/4"x 11", 256 pgs., 683 b&w ill., 86 color. The second volume of Matthew E. Pointon's short stories covering the years 2006 to 2010. This varied collection of tales, arranged in the order in which they were written, has something to capture the imagination of every reader. Computers and their interactions are becoming the characteristic features of our time: Many people believe that the industrial age is going over into the information age. In the same way as life of the beginning of this century was dominated by machines, factories, streets and railways, the starting century will be characterised by computers and their networks. This change naturally affects also the institutions and the installations our lives depend upon: power plants, including nuclear ones, chemical plants, mechanically working factories, cars, railways and medical equipment; they all depend on computers and their connections. In some cases it is not human life that may be endangered by computer failure, but large investments; e. g. if a whole plant interrupts its production for a long time. In addition to loss of life and property one must not neglect public opinion, which is very critical in many countries against major technical defects. The related computer technology, its hardware, software and production process differ between standard applications and safety related ones: In the safety case it is normally not only the manufacturers and the customers that are involved, but a third party, usually an assessor, who is taking care of the public interest on behalf of a state authority. Usually safety engineers are in a better position than their colleagues from the conventional side, as they may spend more time and money on a particular task and use better equipment. Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics A maintenance and repair manual for the DIY mechanic.
