A Foray into the Worlds of Animals and Humans Feb 17 2020 “Is the tick a machine or a machine operator? Is it a mere object or a subject?” With these questions, the pioneering biophilosopher Jakob von Uexküll embarks on a remarkable exploration of the unique social and physical environments that individual animal species, as well as individuals within species, build and inhabit. This concept of the *umwelt* has become enormously important within posthumanist philosophy, influencing such figures as Heidegger, Merleau-Ponty, Deleuze and Guattari, and, most recently, Giorgio Agamben, who has called Uexküll “a high point of modern antihumanism.” A key document in the genealogy of posthumanist thought, *A Foray into the Worlds of Animals and Humans* advances Uexküll’s revolutionary belief that nonhuman perceptions must be accounted for in any biology worth its name; it also contains his arguments against natural selection as an adequate explanation for the present orientation of a species’ morphology and behavior. *A Theory of Meaning* extends his thinking on the *umwelt*, while also identifying an overarching and perceptible unity in nature. Those coming to Uexküll’s work for the first time will find that his concept of the *umwelt* holds new possibilities for the terms of animality, life, and the framework of biopolitics.

**The Mars Mystery** Feb 28 2021 An asteroid transformed Mars from a lush planet with rivers and oceans into a bleak and icy hell. Is Earth condemned to the same

fate, or can we protect ourselves and our planet from extinction? In his most riveting and revealing book yet, Graham Hancock examines the evidence that the barren Red Planet was once home to a lush environment of flowing rivers, lakes, and oceans. Could Mars have sustained life and civilization? Megaliths found on the parched shores of Cydonia, a former Martian ocean, mirror the geometrical conventions of the pyramids at Egypt's Giza necropolis. Especially startling is a Sphinx-like structure depicting a face with distinguishable diadem, teeth, mouth and an Egyptian-style headdress. Might there be a connection between the structures of Egypt and those of Mars? Why does NASA continue to dismiss these remarkable anomalies as "a trick of light"? Hancock points to the intriguing possibility that ancient Martian civilization is communicating with us through the remarkable structures it left behind. In exploring the possible traces left by the Martian civilization and the cosmic cataclysm that may have ended it, *The Mars Mystery* is both an illumination of our ancient past and a warning--that we still have time to heed--about our ultimate fate.

**Leptin and Reproduction** Apr 20 2020 The isolation of leptin in 1994 and its characterization as a factor influencing appetite, energy balance, and adiposity, immediately thrust the polypeptide into the rapidly growing body of literature centered on the physiology of obesity. The growing clinical awareness of obesity as a major health risk in developed societies dovetailed perfectly with any of a number of roles that leptin might play in this abenant physiological condition. Almost unnoticed amidst the excitement generated by early leptin publications was the suggestion that the "fat hormone" might also regulate a wide range of systems and events important to reproduction, including pubertal development, gonadal endocrinology, fertility, and pregnancy. Recognizing this potential, a relatively small cadre of researchers began to examine leptin specifically as a reproductive hormone, thus creating a new and fertile field of investigation. Interest in this area has since gained momentum and an increased number of participants have now made significant contributions to our understanding of many leptin-related mechanisms that are relevant to reproductive biology. *Leptin and Reproduction* is the first major volume to specifically address leptin as a reproductive hormone and closely examines the advances made in the short time since this field of interest developed. Preeminent researchers ti'om many of the subdisciplines working

within this area present a welcomed compendium of the wealth of related literature and voice novel interpretations of current advances.

**The Society of Reluctant Dreamers** Apr 01 2021 While swimming in the clear blue waters of the Rainbow Hotel, Daniel Benchimol finds a waterproof camera, floating seemingly lost in the sea. He goes on to discover that the camera belongs to Moira, a Mozambican artist famous for a series of photos depicting her own dreams. On seeing the images, Daniel realises that Moira is also the mysterious woman whom he has been dreaming about repeatedly. The two meet, and Daniel becomes involved in a unusual dream experiment with a Brazilian neuroscientist, who's working with Moira on a machine to film and photograph people's dreams. Meanwhile, Daniel's daughter Karinguiri, one of Angola's young dreamers, is arrested along with six friends for staging a protest during a presidential press conference in Luanda. The group go on hunger strike, attracting worldwide press attention, showing the power of young people when they raise their voices against the regime. *The Society of Reluctant Dreamers* is a surreal, vivid novel about the slipperiness of truth and reality, art versus dictatorship, courage versus fear, change and the old order, amidst the politics of Angola's tumultuous past, present and future.

**Learning and Expanding with Activity Theory** Sep 25 2020 This book is a collection about cultural-historical activity theory as it has been developed and applied by Yrjö Engeström. The work of Engeström is both rooted in the legacy of Vygotsky and Leont'ev and focuses on current research concerns that are related to learning and development in work practices. His publications cross various disciplines and develop intermediate theoretical tools to deal with empirical questions. In this volume, Engeström's work is used as a springboard to reflect on the question of the use, appropriation, and further development of the classic heritage within activity theory. The book is structured as a discussion among senior scholars, including Y. Engeström himself. The work of the authors pushes on classical activity theory to address pressing issues and critical contradictions in local practices and larger social systems.

*Brave New Girl* Mar 12 2022 A fourteen-year-old trying to find her way in the world, Doreen is as much an outcast at school as she is at home. But when her older sister begins dating a bewildering twenty-one-year-old named Matthew, Doreen must confront feelings she never knew she possessed. Forced into adulthood kicking and screaming (not to mention swearing), Doreen ultimately impels her troubled family to forge a new understanding of the world -- and, maybe more surprisingly, of one another. **Usher's Passing** Aug 05 2021 Poe's classic tale lives on in this gothic novel of ancestral madness in the mountains of modern-day North Carolina, from a New York Times–bestselling author. Ever since Edgar Allan Poe looted a family's ignoble secret history for his classic story “The Fall of the House of Usher,” living in the shadow of that sick dynasty has been an inescapable scourge for generations of Usher descendants. But not for horror novelist Rix Usher. Years ago, he fled the isolated family estate of Usherland in the menacing North Carolina hills to pursue his writing career. He promised never to return. But his father's impending death has brought Rix back home to assume the role of Usher patriarch—and face his worst fears. His arrival forces him to confront a devious and impassive family and his vulnerable sister's slow descent into insanity. Stirring memories of the grim folktales born out of the surrounding Briartop Mountains and the terrifying legends of missing children, Rix knows that in the dark, twisted corridors of Usherland, that dreadful something he saw as a young boy is still there. It's waiting for him, as decayed and undying as the Usher heritage, and more depraved than anything Poe could have imagined. This eerie novel by the Bram Stoker Award–winning author of *Swan Song* and *Boy's Life* is “a frightening pleasure” and a worthy tribute to the master who inspired it (St. Louis Post-Dispatch).

**Tales of the Night** Jan 22 2023 These eight stories are linked by a date and a motif. All of them have to do with love. Love and its conditions on the night of March 19, 1929. In his second book and his only collection of stories, Peter Høeg proves himself to be a true storyteller in the tradition of Karen Blixen and Joseph Conrad. These beautifully constructed tales deal with love, the classic arts and sciences, and the confrontation of Western and non-Western cultures. Moving from a railroad car in the Congo to a sailboat in Lisbon's harbor to an upper-class apartment in Copenhagen, they include the tales of a young, disillusioned mathematician who comes face-to-face with his culture's distortion of Africa; an esteemed judge who runs off with the young man he has just sentenced to prison for his homosexual tendencies; and a town--sealed off from the plague--that is infiltrated by a troupe of traveling actors.
